Learning through courses and hands-on experience

2021 - Present

Franco

GOMEZ

SOFTWARE DEVELOPER

ABOUT ME

I'm a professional who combines full-stack web development with cloud infrastructure management. I build robust applications by integrating front-end and back-end technologies, while also managing relational databases and server deployments. Throughout my career, I've worked on management systems, automation processes, and custom solutions for clients across various industries. I handle the entire development cycle: from planning and design to implementation, deployment, and ongoing maintenance.

EXPERIENCES

SOFTWARE WEB DEVELOPER (INTERNSHIP)

Vates, Córdoba

Nov. 2023 - Jul. 2024

- Developed and maintained internal applications essential for optimizing workflows and saving time.
- Full-stack development using React (Next.js) for the front-end and FastAPI (Python) for the back-end.

FREELANCE | FULL-STACK & CLOUD SOLUTIONS

Mazzoccone lawyers

Dec. 2023 - Present

- Developed a custom case management system with a partner, tailored to the needs of the law firm.
- Took care of the entire development cycle, from full-stack architecture to infrastructure and deployment.
- The system is in daily use, and I continue to provide maintenance, support, and improvements.
- This experience strengthened my skills in development, automation, and production environment management.
