**Scrum Metodologies**

## LANGUAGES

**Spanish**
**English**
**Italian**

# FRANCO GOMEZ

I am a web developer specialized in React, with experience in both front-end development, working with frameworks like Next.js and Vite, and back-end development using Node.js and FastAPI. Throughout my career, I have honed my skills through a variety of projects in diverse industries, management systems, and more. Additionally, I have closely collaborated with clients to provide technology solutions tailored to their specific needs, transforming requirements into productive products as part of a team. I consider participation in reviews and feedback as fundamental pillars for team growth and achieving proposed goals. On my website at frang.vercel.app, you can find more information about my experience, projects, and skills as a web developer.

## WORK EXPERIENCE

**Nov 2023 - Jul 2024**

**Software Developer**
Vates, Córdoba

• I have had the privilege of working in a team on the development of internal applications that are currently essential for optimizing time and processes.
• Collaboration on projects with clients across various industries, such as Dentistry, Food, etc. These projects range from management systems to specific solutions tailored to each client's needs.
• The maintenance and development of these applications were carried out using technologies like React (Next.js) and FastAPI (Python).

**Dec 2023 - Present**

**Freelance**

Managing projects for clients and working closely with a colleague. We handle the entire development cycle, from planning and design to implementation and maintenance of systems. This experience has allowed me to develop key skills in project management, client communication, and solving technical problems in a dynamic and collaborative environment.
